## Installation Instructions

Hoses Rirect

## Technical Data

The Albion ART 25 is a fixed orifice double regulating valve used to regulate and measure the flow passing through it.

## Flow Coefficient

The flow rate can be calculated using the Kv value and a measured signal.

```
\(\mathrm{K}_{v}=\underset{\sqrt{\Delta P}}{\mathrm{Q} * 36} \quad \mathrm{~K} v \mathrm{~s}=\mathrm{Q} * 36\)
where Kı \& Kvs = flow coefficient ( \(\mathrm{m}^{3} / \mathrm{hr}\) at 1 bar differential)
        \(\mathrm{Q}=\) flow rate ( \(\mathrm{I} / \mathrm{s}\) )
        \(\Delta P=\) headloss attributable to valve (kPa)
        \(\Delta \mathrm{Ps}=\) differential pressure across tappings (signal) (kPa)
```

## Kvs Values

| Size | $1 / 2^{\prime \prime}$ | $3 / 4^{\prime \prime}$ | $1 "$ | $114^{\prime \prime}$ | $112^{\prime \prime}$ | $2^{\prime \prime}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Kvs | 1.8 | 4.1 | 7.5 | 16.6 | 23.0 | 47.4 |

## Pressure Loss

The pressure loss across the fixed orifice double regulating valve is the combined loss attributable to the orifice plated and double regulating valve in the fully open position.

## $K_{v}$ Values

| Size | $1 / 2^{\prime \prime}$ | $3 / 4^{\prime \prime}$ | $1 "$ | $11 / 4^{\prime \prime}$ | $11 / 2^{\prime \prime}$ | $2^{\prime \prime}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Kv | 1.8 | 3.8 | 7.0 | 15.8 | 21.1 | 43.9 |

## Installation

Fixed orifice double regulating valves must always be installed with a minimum of 5 pipe diameters of straight pipe, without intrusion, upstream of the orifice plate.

Downstream of the valve a minimum of 2 pipe diameters of straight pipe are required.

## Technical Data

## Sizing

Once the required flow rate has been calculated, the size of the fixed orifice double regulating valve can be determined based on the following:

The minimum signal at the design flow rate of 1 kPa .
For minimum pressure loss, a maximum signal of 4.7 kPa , which corresponds to the maximum differential pressure range of a fluorocarbon manometer.

## Pressure Equipment Directive

Under the Pressure Equipment Directive (PED) these fixed orifice double regulating valves have been specified for Group 2 Liquids i.e. non-hazardous

Sizes $1 / 2 "$ to $2^{\prime \prime}$ are classified as SEP (Sound Engineering Practice)
