## Miniature Fittings

## Series M

## Tubing Connection and Removal

## Connection of tubing

1. Cut the tubing perpendiculary allowing additional length.
2. Insert the tubing into the sleeve
3. Insert the tubing slowly into the fittings. Make sure to secure a gap of approx. 0.5 mm between the tubing end and the barb end
4. Insert the sleeve slowly. Make sure not to allow any gap between the sleeve end side and the body end side. If you feel any strong resistance and cannot push the sleeve completely to the end side, this may be caused due to jamming. Remove and repeat again by starting from step 1 making sure to secure a gap in step 3.

## Removal of Tubing

1. Withdraw the sleeve straight along the tubing. Use a tool such as long-nose pliers if it is difficult to pull out by hand
2. Withdraw the tubing straight.
3. When reusing the tubing, cut off the previously installed portion of the tubing to avoid possible leakage and/or disconnection of the tubing.

| Specifications |  |
| :--- | :--- |
| Applicable tubing material: | Polyurethane |
| Applicable tubing (O.D / I.D): | $2 / 1.2$ |
| Fluid: | Air, Water |
| Max. Operating pressure: | 1 Mpa |
| Ambient and fluid temperature: | -5 to $60^{\circ} \mathrm{C}$, Water: 0 to 40 (No Frezzing) |
| Thread: | JIS B0205 ( Metric fine thread) |

Male Studs

| Part Number | A | B | C | D | E | H | Effective <br> Area $\mathbf{~ m m ~}$ | Weight <br> (g) |
