

Agriculture & Food Food Industry/Cleaning

Trelljet 681 Antimicrobial Blue or Red

Application

Specifically designed for professional and industrial high pressure cleaning in the food industry and swimming pools. Antimicrobial Trelljet 681 red or blue is suitable for all environments where bacteria are concerned such as cleaning companies, food factories, healthcare institutions, pharmaceutical, packaging and bottling plants.

It is also suitable for use with mobile pressure washers, fixed installations and is ideal for reel mounted applications.

Technical Description

Inner Tube: NBR/SBR, black and smooth.

Reinforcement: Synthetic textile.

Blue Cover: SBR/NBR, blue, smooth.

Red Cover: SBR/NBR, red, smooth

Temperature Range: -40°C to +120°C.

Advantages

- A crush resistant hose with a non-staining, wear and weather resistant smooth cover.
- Antimicrobial protection: prevents odour, stain, degradation and breakdown from bacterial attacks.
- It is highly flexible and kink resistant even at high temperatures.
- Long service life.
- Oil and detergent resistant.

Thermoclean® AL 20

Application

Thermoclean AL 20 hose is used for hot water washdown in food processing industries such as dairies and abattoirs and also for the transfer of food products.

Technical Description

A flexible 4 ply food quality PVC hose with twin polyester braided reinforcement. It has a special intermediate adhesive layer and white inner layer. Light blue outer cover and white liner.

Temperature Range: -15°C to +70°C. (20 Bar to 70°C).

Advantages

- The non-staining blue outer cover is very resistant to animal fats, blood and grease.
- The material properties used enable the hose to have high performance properties ensuring it is a safe and reliable hose which will withstand heavy duty applications.
- Excellent handling.
